UNLOCKING THE JOY OF PLAY

What kinds of play do you and your child love to share? We're exploring how sensory profiles shape the playtime experiences between parents and children (aged 3-5 yrs), including both neurotypical children and children with diverse neurodevelopment (e.g., autism, ADHD).

PARTICIPANTS NEEDED

We are looking for parents/ primary caregivers to help us understand:

- Your child's unique **Sensory Profile**
- The **Play Preferences, Frequency, and Enjoyment** you share

Participants who complete the survey will go into a draw to win **1 of 4 online \$50 gift cards.**

Optional Interview

At the end of the survey, parents of neurodivergent children will be invited to participate in an interview that will dive deeper into the joys and challenges of playtime! They will also go into an additional draw to win **1 of 2 online \$50 gift cards.**

If you are interested in participating in this research, please see the following link to obtain further information or scan the QR Code below:
