

Do you conduct autism screenings with toddlers?

Help us understand autism screening practices in Australia

We are conducting a survey to learn more about current autism screening practices.

Who can participate?

Anyone currently working in Australia who conducts autism screenings with children under 4 years old as a part of their work role.

What is involved?

Complete an anonymous online survey that will present two hypothetical case studies for you to read and then answer a series of questions.

How long will it take?

The survey is expected to take approximately 30-40 minutes to complete.

In recognition of your time, you can opt to receive a \$10 Coles Group and Myer e-voucher upon completion of the survey.
